

Bardha Citaku

WHAT DOES THE EU MEAN TO ME ?

It is actually a really hard question to answer. It's hard to talk about something you have never experienced or have never been a part of . It's like a Siberian talking about a really hot day at the beach , something he could only see on the TV. But I will try to explain it a little bit.

EU is a big family which includes different histories, political systems , institutions and economies . With a population of more than 500 million , it has about 10% of the world's population and is one of the strongest economic areas , which we would love to be a part of.

There are a lot of EU projects in Mitrovica , especially in the Northern Part , which are changing our lives for better. And for that , we will always be thankful as a little country.

Being a part of the EU , would positively affect our education system which is the base of a strong country . It would also affect our politic, economic and law system which is drowning day after day.

EU would be a good chance for KOSOVA to reel. As the oldest population of Balkan, and also Europe, I think we deserve that mostly.

European Union means a better life for us and our children, a legal country with more human rights, a stable economic situation , and less poverty and hunger.

It's really hard to be isolated. You don't have the chance to study abroad , visit your relatives , or have the perfect holidays.

We are a FAMILY. No borders needed. If our politicians don't deserve it , we do.

When we become a part of the EU , even if I'm 70 years old or more , I promise I will publish an essay with this topic. Then I won't be as confused as I am now .
