

The **EU and EBRD** have co-financed a **loan scheme** (REEP) to help SMEs and the public and residential sector.

**€0.8 million**

supporting 2 projects in 2 municipalities through European Skills, Competences and Qualifications ESCO

**€647 thousand**

supporting Ministry of economy and Ministry of environment through 9 policy deliverables (in the legal framework for energy efficiency of the buildings;

**€8.7 million**

in sub-loans for 1,071 beneficiaries Support to residential sector through intermediated financing

**€56.3 million**

investment provided through a financial risk guarantee (of which 18m loan from EBRD) for development of the Kitka wind farm

**€10 million**

for 2 projects in energy efficiency in public buildings for Pristina and Prizren

## Green Agenda, Climate and Environment

The EU's commitment to environmental protection helps Kosovo achieve its green agenda and mitigate climate change.

**55% reduction in greenhouse gas emissions** by 2030 2030 and carbon neutrality by 2050

**€2 million**

for preparation in progress of design to reduce SO2 emissions from Kosovo B

**€1.5 thousand**

for feasibility study to upgrade the Kosovo B power plant to meet LCP/IED requirements completed in 2017

**€1.5 million**

to prepare the decommissioning of the Kosovo A power plant

**€74 million**

in the Kosovo B power plant to reduce dust and NOx emissions to limit the IED

**€12 million**

for wastewater treatment plant at Kosovo B power plant to treat industrial and other water

**€8 million**

provided by The Covenant of Mayors for the Western Balkans and Turkey for energy and climate plans in Kosovo municipalities

# EU Support for Energy Sector in Kosovo

#FORGOODENERGY

The EU paves the way for Kosovo's sustainable energy future

## Energy Support Package for Kosovo

**€1 BILLION**

To tackle the energy crisis in the Western Balkans

**€500 million**

Immediate measures to tackle the energy crisis

**€500 million**

Short-and medium-term measures through targeted investments

**€75 million**

Immediate assistance to Kosovo

**€25 million**

Direct financial support to the disadvantaged

**€15 million**

Incentives for energy saving for households

**€20 million**

Supporting households in increasing building efficiency

**€10 million**

Supporting households in increasing household appliances efficiency

**€5 million**

Increasing efficiency in small and medium businesses

**€55 million**

Two clean energy projects: Solar Park in KEK and Solar Thermal Plant for Termokos

**€2 million**

Feasibility study for district heating systems in Kosovo in 2023

## Energy Security

### Boosting investment in Renewables and Grid Reinforcement

**€15  
million**

to connect renewable energy projects with **the transmission network infrastructure (KOSTT)**

**€17.6  
million**

in the thermal energy production of the Kosovo B power plant

Studies to support **Kosovo's energy sector** and providing institutional support to the government, energy regulator, and KOSTT

Study on assessment of potential for developing large scale renewable energy projects including mapping of locations in Kosovo

European Fund for Sustainable Development Plus – guarantees and financial instruments to aid investments in Energy in Kosovo

The EU's support ensures Kosovo has a stable energy supply, making it more resilient and sustainable.

## Energy Efficiency

The EU's investment in energy efficiency has enabled Kosovo to reduce energy waste and improving energy efficiency.

**€13  
million**

in energy efficiency in municipal public buildings, for 74 projects in public building and public lighting

**€5.6  
million**

in rehabilitating the district heating network in Pristina

**€2.5  
million**

in **Energy Community Treaty requirements** through energy efficiency and renewables

**€200  
thousand**

in technical assistance and investments through the **Kosovo Energy Efficiency Fund (WBIF study)**

Promoting energy efficiency and renewable energy through **policies, training and public awareness-raising initiatives.**
